ALLIANCE

CYBER SECURITY & PRIVACY ESSENTIALS

WHY ATTEND

The internet brings huge business opportunities and benefits, but it also brings risks. Every day there are cyberattacks on UK companies like yours, attempting to steal your information and money, or disrupt your business. It is increasingly important to manage these risks to take advantage of the internet whilst protecting your business.

The National Cyber Skills Centre is working with Cyber Management Alliance to deliver a one day immersive masterclass to educate organisations on the cyber threats that they face, the strategic significance of cyber security and its relevance and importance to the modern business. Learn from experienced professionals who are practitioners rather than just trainers, and see the world through the eyes of real cyber attackers, while discussing the latest cyberattacks.

ABOUT THE COURSE

Cyber Management Alliance's Cyber Security & Privacy Essentials course allows director's and managers to understand business critical risks and issues of cyber security, empowering you to make the right business decisions to reduce your organisation's risk exposure.

YOU WILL LEARN

- Business impacts of real world cyber attacks.
- How to cost effectively manage your risk exposure
- What are the Top 10 Cyber Threats of 2016.
- Understand the impact of Internet of Things, social media and mobile smart computing.
- Understand the latest regulations including the new EU Data Privacy Laws and why you need to comply now or face significant fines.

GCHQ CERTIFIED TRAINING

Certified Training

The GCHQ Certified Training scheme certifies high quality training courses that deliver practical high value guidance to organisations.

The Cyber Security & Privacy Essentials training course material and trainers have been benchmarked against GCHQ'S rigorous standards based on the relevant areas of the IISP Skills Framework which also underpins the GCHQ Certified Cyber Security Master's degrees.

This course is CPD Accredited which means that delegates who complete the course can use their attendance within their CPD portfolios.

COURSE CONTENT

- Understand who is attacking you and why.
- How to develop a cyber security strategy and develop a cyber safe culture within your organisation.
- Understand the legal and regulatory requirements that affect organisation security policies and where to find resources.
- How to audit your current processes and procedures to identify weaknesses.
- What to do when you are breached including preserving evidence, communicating with your staff, customers, suppliers and authorities.
- Understand the various Cyber Security frameworks and establish which are the most appropriate for your organisation.
- How to keep your organisation and employees Cyber Safe.
